

UVision Air Secured a contract to supply its Hero-120 Loitering Munition System to a European Country

Contract Awarded Following Successful Arctic Winter Conditions Demonstration

DSEI, London, September 12-15, Hall1 Booth 156

September XXX 2023 - UVision Air Ltd. - a global leader in Loitering Munition systems of all sizes for a variety of missions, announces the successful signing of a contract to supply its Hero-120 Loitering Munition System to an undisclosed European country. This significant achievement is the outcome of a productive collaboration with Rheinmetall, initiated in 2021. It follows a series of successful flight missions demonstrating the Hero-120's exceptional capabilities in the extreme Arctic winter conditions.

These missions encompassed extreme low temperatures, heavy snowfall, strong winds, high humidity, ice-forming flight conditions, low cloud cover, and limited visibility, both day and night.

Major General (ret.) Avi Mizrachi, CEO of UVision, says "We are proud of this latest contract, which was secured shortly after we have demonstrated the unique capabilities of the Hero-120. The system's effectiveness extends beyond addressing the specific needs of military forces operating in the Arctic, reaching the broader regions of northern and eastern Europe. The successful partnership between UVision and Rheinmetall has recently resulted in several significant agreements across Europe, including the supply of specialized munition systems to Hungary. This contract emphasizes the trust placed in the Hero-120 Loitering Munition System, further strengthening its status as the premier choice for military forces operating in extreme environments.

About UVision Air Ltd.

UVision designs and manufactures combat-proven smart loitering munition systems, providing military organizations around the globe with precise and effective operational attack capabilities. Its innovative, cost-effective systems are based on cutting-edge technology and 30 years of extensive field experience by military professionals, engineers, and the company's own management team.

The HERO series of systems provides high-precision strike capabilities, based on unique aerodynamic platform configurations. UVision's loitering munitions are designed with unique flight qualities for precision-attack munitions, integrating advanced airborne guidance and sophisticated navigation algorithms, integrated with C4I stations – thereby meeting the requirements of today's modern battlefield for combat in complex and dynamic environments. The HERO series of loitering munitions is suitable for tactical and strategic targets – whether for short, medium or long-range – utilizing a variety of warheads to ensure maximum mission effectiveness. The units are operationally deployed and field-proven. ISO certified, UVision is fully committed to providing turnkey solutions to its

extensive network of partners and customers around the world, with high-quality service and swift support.
